Thermocouples to DIN 43 732

- for temperatures up to +1600°C
- standardized voltage tables for thermocouples to EN 60 584, Part 1 and DIN 43 710
- for push-in thermocouples to DIN 43 733

These thermocouples are intended as replacement elements for thermocouples to DIN 43 733. The thermocouples can also be used for direct temperature measurement in special applications. The maximum temperatures specified can only be taken as guide values for the limit with continuous use in air that does not contain harmful gases. The thermocouple must not be mechanically stressed during operation.
